**FORM
 PMR 4**

JEWELLER'S PERMIT

Declaration Form pursuant to Regulations 14(2)(aA) and 33 made under the Precious Metals Act, 2005
 Instructions, guidelines on how to fill the Declaration Form can be found at www.sadpmr.co.za

Precious Metal Received/Bought				Articles Manufactured ⁵	Precious Metal Disposed of /sold									Metal Refined/Recovered/ Returned		
Month	Source /Supplier ¹	Form of Precious Metal & Caratage ²	Total Mass / Weight ³ (g or kg) ⁴		Mass & Caratage of Metal used for Manufacturing and Repairs	Month	Recipient/Refinery ¹	Nature of Precious Metal ⁶	Metal Refined/Recovered in Fine mass ⁴ / Weight ⁷ (%, g or kg) ⁴							Yes(Metal Received)
				Au					Pt	Pd	Rh	Ru	Ir	Os		
				Number of employees ⁸ (during the Financial Year)												

* A true copy of this document must be submitted to the Regulator no later than 15 July for the first half of every calendar year (H1) and no later than 15 January for the second half of every calendar year

Important: Read the guidelines before completing this form

- Name, address and license, permit, certificate or registration number of the seller/recipient/refinery. If metal is exported/imported please state so
- Form of precious metal bought/received (e.g. 2g of 18 ct white gold wire, 3g of 9ct gold bar, 6g of scrap etc.)
- Total mass of the specific type of metal bought in the month (e.g. 20g (for all the 9ct gold alloy bought in Jan)) NB Not fine mass
- Delete whichever unit that are not applicable (i.e. units not used)
- List the type and number of articles manufactured in the month (e.g. 7, 18ct gold rings). The column does not have to correspond with entries on the left (precious metal bought) or right column (precious metals sold). Use additional pages of this form if required
- The form of precious metals sold/dispensed and the gross mass in grams or kilograms (e.g. 2g of 18ct white gold wire, 10g of scrap etc.)
- Fine mass/weight: the mass of the precious metal contained in the article/product, as determined by multiplying the gross weight of the article/product by its caratage divided by 24 or fineness divided by a thousand. e.g. for an 18 ct gold alloy weighing 1gram , the fine mass of gold in the alloy is calculated like this: $1g \times \frac{18}{24} = 0.75g$
- Average number of employees employed during the financial year
